

D&P Flexiloo

A freshwater flush, vacuum pump system of toilet cubicles, vanity units and urinal fixtures. These are designed to be installed within the marquee structure making them more convenient for guests. We have also successfully placed Flexiloo on roof top locations, studios, and recently in the moat of the Tower of London. This is possible as the system is lightweight, folds into compact units and can be plumbed up on site. Flexiloo is unique in its manoeuvrability and can fit through a 1.9m X 0.69m doorway.

Sustainability...

The Flexiloo system is the ultimate in **hygienic environmentally friendly** toilets – only 0.5 litres of water is used per flush – and during each flush, air is sucked out of the cubicle – sucking bacteria into a sealed system, rather than being atomised into the room.

Beautiful Freshwater Cloakrooms

No steps, no blue flush, no dilemma of covering the area between the toilet trailer & marquee. (Waste) can be pumped up to 50m from the structure to mains drains eliminating all tanks on site. All pumps are located externally to the structure. Difficult access sites are no longer without good toilet facilities.

Ideal For

- High-class parties
- Indoor venues
- Difficult access sites
- Winter marquee events
- Environmentally friendly events

Assembled Dimensions

Vanity unit: Depth: 0.6m Width: 0.9m Height: 2.2m
Single toilet: Depth: 1.8m Width: 0.9m Height: 2.2m
Triple urinal: Depth: 0.9m Width: 1.8m Height: 2.2m

HIGH CLASS FACILITIES FOR ALL OCCASIONS
